Design and Engineering Solutions for Integrators

SYMBOL LOGIC **DESIGN AND ENGINEERING**

Whether you do it yourself or we do it for you, the process and tools used are the same - Symbol Logic's ***Engineering Complete AV (ECAV)*** - an extensive software template package developed over many years, provides an unparalleled, total wire-diagramming and documentation solution for any AV system installation

- ***Symbol Logic*** will help get your design and engineering documentation done accurately and on time. Having this documentation is the key to achieving:
 - ✓ **Successful communications among all project stakeholders**
 - ✓ **Successful proposals**
 - ✓ **Successful programming**
 - ✓ **Successful installations**
 - ✓ **Successful servicing**
- ***Symbol Logic*** provides four key drawing sections:
 - ✓ **Floor Plan Layouts**
 - ✓ **Full System Block Diagram**
 - ✓ **Detailed Schematic Diagrams**
 - ✓ **Equipment Rack Diagrams**
- Each ***Symbol Logic*** drawing section also provides vital project information such as wiring schedules and many other detailed reports
- Take the time to review this ***Symbol Logic*** documentation package. We think you'll agree... you should be providing this level of documentation on all of your projects!

FLOOR PLAN

Symbol Logic's floor plan layouts are the preliminary design drawings that clarify and confirm to all project stakeholders, the physical location of key devices, racks and head-ends on each floor of the project

Features:

- ✓ Two styles of pre-configured floor plan pages for quick layouts
- ✓ Easily import AutoCAD, PDF or other images as floor plan backgrounds
- ✓ Floor plan symbols automatically scale for any size architectural background
- ✓ Fully configurable symbols can represent any present or future device, mounting style and placement
- ✓ Color coded symbols for easy identification. Symbols can be switched to no-color if desired
- ✓ Easily create the floor plan legend right from the drawing page
- ✓ Easily create your device schedule including a QuickEstimate for the entire project, right from the job site
- ✓ Provides the needed information for creating the Block Diagram

BLOCK DIAGRAM

Symbol Logic's unique and powerful riser-style block diagram clearly shows the full-system wiring infrastructure including all floors and interconnected room and head-end electronics in a single view. It is also the source for generating accurate pre-wire schedules and many other reports

Features:

- ✓ ClearView layout is organized to show head-end electronics on the left, pre-wire types and colors in the center and room electronics on the right
- ✓ Pre-made and customizable area modules simply snap into place without having to connect wires, saving layout time
- ✓ Easily change the drawing layers to show and report-on any combination of sub-systems in the project including:
 - Audio/Video
 - Control
 - Network
 - Phone/Intercom
 - RF/TV Distribution
 - Environmental Control
 - Power
- ✓ Easily update device and wire data for your reports
- ✓ Easily generate and customize reports such as:
 - Device legend
 - Device schedules
 - Pre-wire schedules
 - Bill of materials including labor
 - IP and RF device data
 - Electrical power requirements
 - Control system power usage
 - Rack and cabinet ventilation requirements
 - Equipment dimensions for cabinet construction
- ✓ Provides the needed information for creating the Schematic Diagrams

SCHEMATIC DIAGRAMS

Symbol Logic's detailed, yet easy to read, head-end and room electronics wiring diagrams show all external and interconnecting cables and wire terminations

Features:

- ✓ Clearly visualize signal flow, internal wiring and external cables entering and exiting the AV racks and room electronics
- ✓ Specially configured workspace and symbols with wires and terminations already attached help to create detailed schematics fast
- ✓ Quickly and easily create any new device symbol as you work from more than 30 supplied symbol libraries
- ✓ Special power and cable-referencing symbols help keep drawings uncluttered
- ✓ Customizable cable termination section, includes many industry configurations, for help in connector wiring
- ✓ Easily update cable and termination data for your reports
- ✓ Easily generate customizable reports such as:
 - Interconnect cable schedules
 - Cable termination schedules
- ✓ Provides the needed information for creating the Equipment Rack Diagrams

EQUIPMENT RACK DIAGRAMS

Symbol Logic equipment rack diagrams show the correct placement of all rack-mounted equipment

Features:

- ✓ Includes symbols for all racks, rack equipment, custom rack shelves, accessory panels and rack accessories
- ✓ Easily and quickly configure rack equipment symbols to represent any manufacturer and model
- ✓ Easily and quickly adjust all rack equipment symbols to the nearest single RU value
- ✓ Easily turn on or off all displayed RU values
- ✓ Preview depth of rack devices to help in rack wiring
- ✓ Easily generate rack and accessories parts list
- ✓ Show power and ventilation requirements for racks
- ✓ Show millwork dimensions for cabinet and wall openings

REPORTS

Symbol Logic's reporting feature allows you to generate powerful reports based on the data in your drawings. Each drawing section delivers unique project information from which unique schedules can be generated

Features:

- ✓ Internal Data – Symbols have a data entry feature from which pre-loaded and custom data can be entered. Using this data, pre-configured and custom reports can be generated such as device legends, pre-wire and interconnect cable schedules
- ✓ External Data – The external database (your company catalog) of products, parts, labor and other associated data link to your drawings to provide even more detailed reports and schedules
- ✓ QuickEstimate Schedule
- ✓ Pre-Wire Schedules
- ✓ Device Schedules
- ✓ Technical Schedules
 - Electrical power requirements
 - Control system power requirements
 - Rack and cabinet ventilation requirements
 - Equipment dimensions for cabinet construction
 - Network addresses
- ✓ Interconnect Cable Schedules
- ✓ Cable Termination Schedules
